

Studies in Heredity as: Illustrated by the Trichomes, of Species and Hybrids of Juglans, Oenothera, Papaver, and Solanum (Classic Reprint) (Paperback)

By William Austin Cannon

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Studies in Heredity As: Illustrated by the Trichomes, of Species and Hybrids of Juglans, Oenothera, Papaver, and Solanum In investigating the structural features Of plants two or more methods Of approach, each especially adapted to the particular aim Of the study. Whatever it may be, may be employed. The entire anatomy Of a few forms may be worked up, and appropriate comparisons instituted, or, on the other hand, special features Of the plant s structure, such as the trichomes, may be minutely studied, both in the mature state and in embryonic condition, in a relatively large number Of individuals as well as great variety Of species. Although the former method has hitherto been the one chie y employed in anatomical studies on plant hybrids, it seems appropriate, in View Of the present tendency to regard a plant as a complex Of more or less inde pendent units, to institute the more special study. Whatever theories may be held, this manner of studying structures in plants, as in animals has long been found, has several advantages...
