## THE CALCULUS OF COMPUTATION

Springer-Verlag Gmbh Sep 2007, 2007. Buch. Book Condition: Neu. 243x164x27 mm. Neeware - Written with graduate and advanced undergraduate students in mind, this textbook introduces computational logic from the foundations of first-order logic to state-of-the-art decision procedures for arithmetic, data structures, and combination theories. The textbook also presents a logical approach to engineering correct software. Verification exercises are given to develop the reader's facility in specifying and verifying software using logic. The treatment of verification concludes with an introduction to the static analysis of software, an important component of modern verification systems. The final chapter outlines courses of further study. 366 pp. Englisch.
