

Projective Differential Geometry of Curves and Ruled Surfaces (Paperback)

Filesize: 3.42 MB

Reviews

If you need to adding benefit, a must buy book. It really is writter in straightforward words and phrases rather than difficult to understand. Your life period is going to be change the instant you total reading this ebook.

(Letha Okuneva)

PROJECTIVE DIFFERENTIAL GEOMETRY OF CURVES AND RULED SURFACES (PAPERBACK)

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 edition. Excerpt: .proportional to them. We shall then find an equation of the form $i, (utvk-ukv,) = 0$, also of the w th degree. By the same reasoning as above, we find that the lines of a complex of the n th degree, which are situated in a given plane, envelop a curve of the n th class, the complex curve of the plane considered. The locus of all lines which satisfy two independent equations, homogeneous in the line coordinates, consists of ∞^2 straight lines. It is known as a congruence. Clearly the lines common to two complexes form a congruence. But a congruence need not be the complete intersection of two complexes, just as a space curve need not be the complete intersection of two surfaces. The essential part of our definition of a congruence is that it contains ∞^2 straight lines. The locus of ∞^1 straight lines is a ruled surface, which may or may not be the complete intersection of three complexes. We shall have occasion to make use of the expression of the homogeneous line-coordinates in terms of non-homogeneous pointcoordinates. For this purpose we need merely put $V_1 = x, V_2 = y, V_3 = z, V_4 = 1, t = af, zt = tf, zs = z s_4-1$, so that $co_{12} = xy_1--x y, ra_{13} = xz --afz, nu = x--x_1$, In particular the two points x, y, z and $a?, y_1, \#$ may be infinitesimally close to each other, so that $x_1 = \dots$
