## BULLETIN OF THE NEW YORK MATHEMATICAL SOCIETY VOLUME 2

To read **Bulletin of the New York Mathematical Society Volume 2** PDF, please click the hyperlink listed below and save the document or have access to additional information that are relevant to BULLETIN OF THE NEW YORK MATHEMATICAL SOCIETY VOLUME 2 book.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 94 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1893 Excerpt: . . . t (). first derivative vanishes p times between these values and also once more when  $x \rightarrow -i$ , and so on, until we find its  $q$  derivative vanishing  $p-1$  times among the values  $x_t, y_i, \dots, y_p, x, \dots, x_v$ , so that the  $(74-p)$ th or  $n$ th derivative must vanish once among them. The same thing would apply to the general formula for differences, etc. The most interesting case of this general formula is when  $p=1$ . It may then be written I have for want of a better name called the general form a composite, and the minor of  $f_x$  is designated by the term body-determinant, or simply the body of the composite, in as much as it is got by striking out the outside rows and columns of the composite. There are two classes of 0 functions in (6) which require classification. The first class includes all of those functions which yield a body such that all elements on one side of its diagonal vanish, either through the operation of differentiation alone or through proper selection of the arbitrary constants. This class may be subdivided according as the elements above or below the diagonal vanish. The second class includes those cases in which the elements on neither side of the body diagonal all vanish, the most interesting case of this class being that in which the body is a differenceproduct. The first class yields readily all the well-known series,...
