

The Threshold of Science; A Variety of Simple and Amusing Experiments Illustrating Some of the Chief Physical and Chemical Properties of Surrounding Objects, and the Effects Upon Them of Light and Heat (Paperback)

By Charles Romley Alder Wright

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1891 Excerpt: .taking fire, so that it may be kept in an ordinary bottle or box freely exposed to the air without inflaming. union of the sulphur and the oxygen, and form a solution containing sulphurous arid; on dipping a blue litmus paper or other test-paper indicating the presence of acids (Expt. 142) into the liquid it will be reddened. Sulphurous acid solution destroys the colour of many vegetable substances, especially when strong, as it exerts a bleaching action upon them. Expt. 239. To prepare Phosphoric Acid.--Burn phosphorus in a bottle of oxygen as in Expt. 234; cork the bottle and allow it to stand an hour or two; at the end of this time all the white fumes of oxide of phosphorus formed by the combination of phosphorus and oxygen will have subsided and become dissolved in the few drops of water which will have remained adhering...
